Watch the Explorers 'SEA How to Draw' classes, where you can follow some of our favourite cartoonists create fun characters, marine animals, research vessels, surfers, divers and lots more online. The series starts with popular cartoonist and author **Dr John Joyce**, drawing fun fishy faces, dolphins, whales, ships and research vessels, as well as surfers, divers and more. Here are details of some of the videos available from the Explorers Education Programme (link below).

### A Scuba Diver

Learn how to draw a SCUBA diver and imagine discovering lots of animals, caves and shipwrecks while diving under the sea. Follow John as he draws a cartoon of a SCUBA diver and all of the equipment a diver needs to discover what lies under the ocean.

### A Scary Shark in the Movies

Sharks are often represented as the scary villain in the movies. Watch and follow John draw a shark character and learn some fun facts about sharks around the world. Don't forget to share the fun fact about sharks with your friends and family.

### Boy and Girl Faces

Have you ever wondered how to draw a male or female cartoon character? Watch and follow John draw girl and boy faces creating fun fishy characters.

### The Marine Institute's research vessel RV *Celtic Explorer*

If you are looking at drawing a cartoon that is a little more challenging, follow John while he draws the Marine Institute's largest research vessel, the RV *Celtic Explorer*. There are lots of details including the vessel's hull, bridge, observation post, as well as the trawl gallows and winches. There are also lots of interesting facts to also learn about the RV *Celtic Explorer* from mapping the seabed, making new discoveries and learning about the fish in our sea.

### The Marine Institute's ROV *Holland I*

Follow John draw the Marine Institute's remotely operated vehicle, ROV *Holland I*. While drawing along with John, you can also find out about some of the exciting discoveries scientists have made while using the ROV *Holland I*.
