

Nature's Noticeboard!

Spring 2010

When you next take a walk by the seaside, check to see if the ringbuoy is in place. If not, report it missing on www.ringbuoys.ie

If you have a digital camera, try some time delay photography. Each day, for one month, take a picture of a budding tree or daffodil to see how it changes over time.

Start a small vegetable garden in a large flower tub. Grow a herb, spring onions, lettuce and tiny tomatoes.

Become a spring detective and try to find some of the following: a budding tree; a daffodil; a caterpillar and frog spawn. You can add other spring events to your list and begin your search.

Watch a seed grow!
Soak a large dried pea or bean overnight. Line a glass jar with paper towels and place the seed between the paper and glass. Put a little water in the jar, place in a sunny spot and watch the seed grow.

You are probably looking at this newsletter on a computer. When you're finished on the computer and if no one else is using it, turn it off to save energy.

Sherkin Island Marine Station would like to thank *PharmaChemical Ireland* for their support in making this newsletter possible. We would like to thank those who have contributed to this newsletter especially John Ball, John Joyce, Michael Ludwig, Matt Murphy, Robbie Murphy and Jez Wickens.
