

Activity

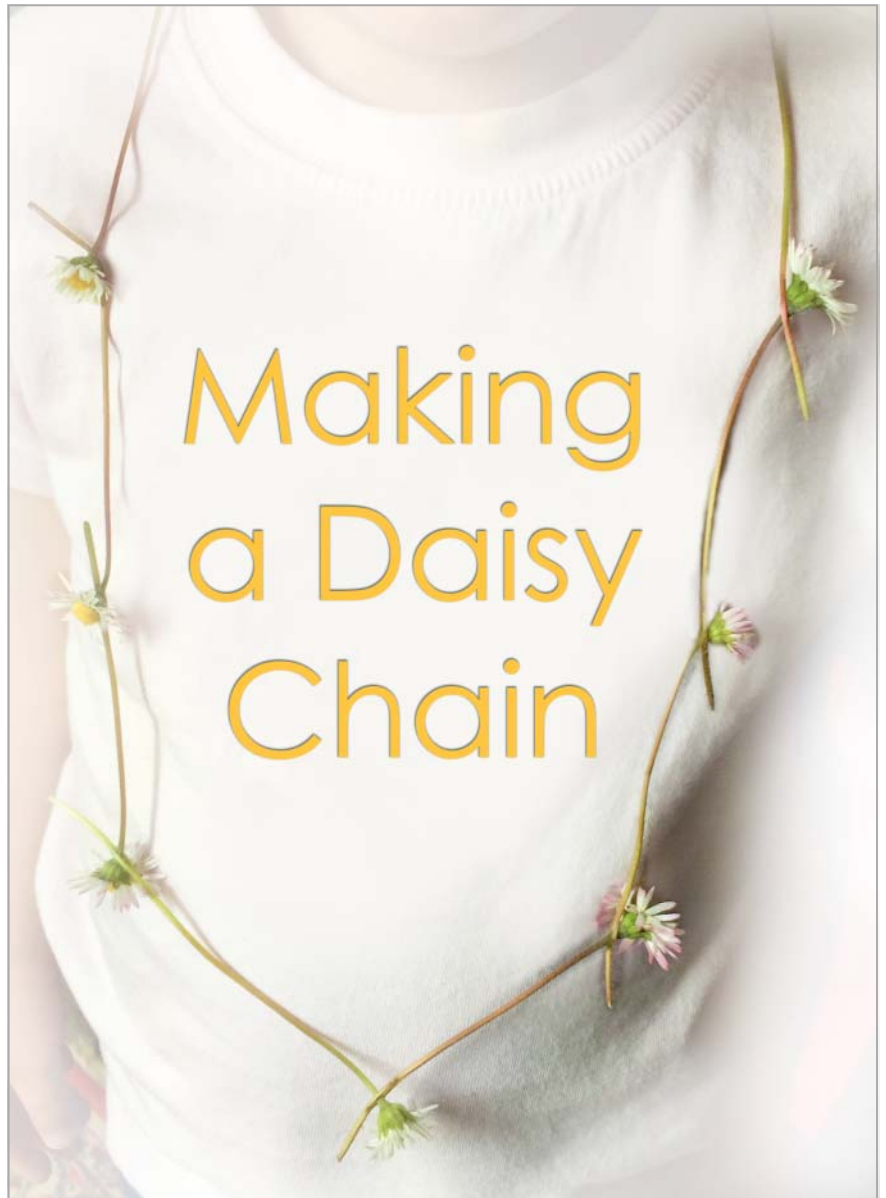

1. Near the bottom of the stem, use your thumb nail to create a split in the stem.

2. Push the stem from both sides to widen the split and create a hole.

3. Thread the stem of another daisy through the hole and pull it through until the head stops.

4. With every daisy you add to the chain, repeat the steps 1-3.

5. When your daisy chain is long enough, knot the first and last daisy to complete the necklace.
